EXPERIENCE

Full Stack Developer | OUTLIER

January 2022 - August 2025

At Outlier, an educational platform offering online diploma programs, I worked as a Full Stack Developer handling everything from project planning to deployment. I built and maintained features using **React** and **Node.js**, optimized platform performance, integrated APIs, and improved the overall user experience. I collaborated with product, design, and QA teams, contributed to sprint planning, and helped uphold best practices in code quality, testing, and documentation.

Full Stack Developer | LOGICAT

May 2020 - December 2021

At Logicat, an auto parts company, I led web development projects with a strong focus on **WordPress**, including custom themes, plugins, and site optimization. I also worked with **PHP**, **Laravel**, and **Vue.js** to build and maintain internal tools and customer-facing features, ensuring reliable performance and meeting business requirements.

Full Stack Developer & Co-Founder | CertainDev

February 2019 - April 2020

As a Full Stack Developer and Co-Founder at CertainDev, I developed **Booster Addons**, a custom **WordPress** plugin that enhances the Elementor page builder with additional widgets and features. I handled the plugin's architecture, coding, testing, and performance optimization to ensure seamless integration within **WordPress** and a smooth user experience.

Full Stack Developer | SayenTheme

October 2016 - January 2019

At SayenTheme, I contributed to the development of addons for WPBakery Page Builder (formerly Visual Composer) on **WordPress**. My work included designing, coding, and testing new features for the plugin, ensuring it was reliable, performant, and user-friendly.
